

WISHIN Pulse Poster – Connection

**YOUR HEALTH INFORMATION,
WHEREVER YOU NEED IT.**

For years, your clinic has been using an electronic health records (EHR) system to share patient information. Now we've joined the Wisconsin Statewide Health Information Network (WISHIN) in an initiative to exchange essential health information with providers outside our care network through a system called WISHIN Pulse.

Pulse grants treating physicians access to your records that's as secure as your current EHR, providing critical information about your medications, allergies, vital signs, lab work and more, helping to prevent unnecessary tests and treatment delays wherever you receive care, whether it's a routine visit or an out-of-town emergency.

With Pulse, every doctor you see in Wisconsin will soon have immediate and secure access to the important health information they need to give you and your family the right care at the right time.
