

# WISHIN Syndromic Surveillance Submission Requirements

For Eligible Hospitals & Critical Access Hospitals

## FOR STAGE 1 MEANINGFUL USE

Eligible hospitals and critical access hospitals intending to attest for the Stage 1 Meaningful Use objective for syndromic surveillance submission to public health may use either of the following options:

*Requirements (Select One):*

- Send all ADT messages (HL7 2.3.1 or HL7 2.5.1) from a 2011 CEHRT for syndromic surveillance
  - Note: WISHIN will filter the data received and only transmit to Public Health the data elements required per the specifications outlined in the PHIN Messaging Guide for Syndromic Surveillance

-OR-

- Send HL7 2.5.1 ADT messages from a 2014 CEHRT for syndromic surveillance that conform to the specifications outlined in the PHIN Messaging Guide for Syndromic Surveillance

## FOR STAGE 2 MEANINGFUL USE

Eligible hospitals and critical access hospitals intending to attest for the Stage 2 Meaningful Use objective for syndromic surveillance submission to public health may use either of the following options:

*Requirements (Select One):*

- Establish ongoing submission of all ADT transactions (HL7 2.3.1 or HL7 2.5.1) from a 2011 CEHRT for syndromic surveillance before 9/30/2013. **Organizations using this approach must initiate their implementation project with WISHIN by 7/1/2013.**
  - Note: Data senders that did not establish and continue ongoing submission during a previous Stage 1 reporting period must re-test/re-establish ongoing submission through WISHIN
  - Note: WISHIN will filter the data received and only transmit to Public Health the data elements required per the specifications outlined in the PHIN Messaging Guide for Syndromic Surveillance

-OR-

- Send HL7 2.5.1 ADT messages from a 2014 CEHRT for syndromic surveillance that conform to the specifications outlined in the PHIN Messaging Guide for Syndromic Surveillance

## TRANSMISSION OF DATA

WISHIN provides two options for transmitting syndromic surveillance messages to WISHIN for delivery to Public Health on behalf of eligible hospitals and critical access hospitals:

- Real-time interface – Connect to WISHIN Pulse via secure TCP/IP MLLP connection

-OR-

- Direct messaging – Transmit a collection of messages compiled over a designated period of time directly to public health via WISHIN Direct+
