

Patient Activity Reports

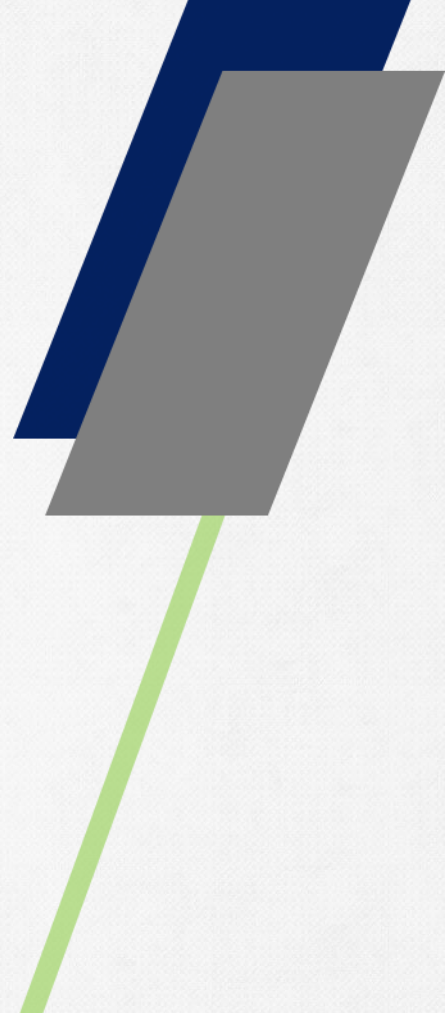

November 9, 2017

WISHIN

INTRODUCTION

- Patient Activity Reports (PARs) are daily reports that notify the recipient if members or patients have had an emergency room or inpatient hospital visit over the past 24 hours
- Can be based upon an ADT interface or a member/patient files
- Sent to a secure ftp site, where recipients can retrieve them
- Most useful for:
 - Payers to determine if follow-up care is needed
 - Care coordination and transitions
 - Clinics to track their patients
- This is an additional subscription service that WISHIN offers

PAR DATA ELEMENTS

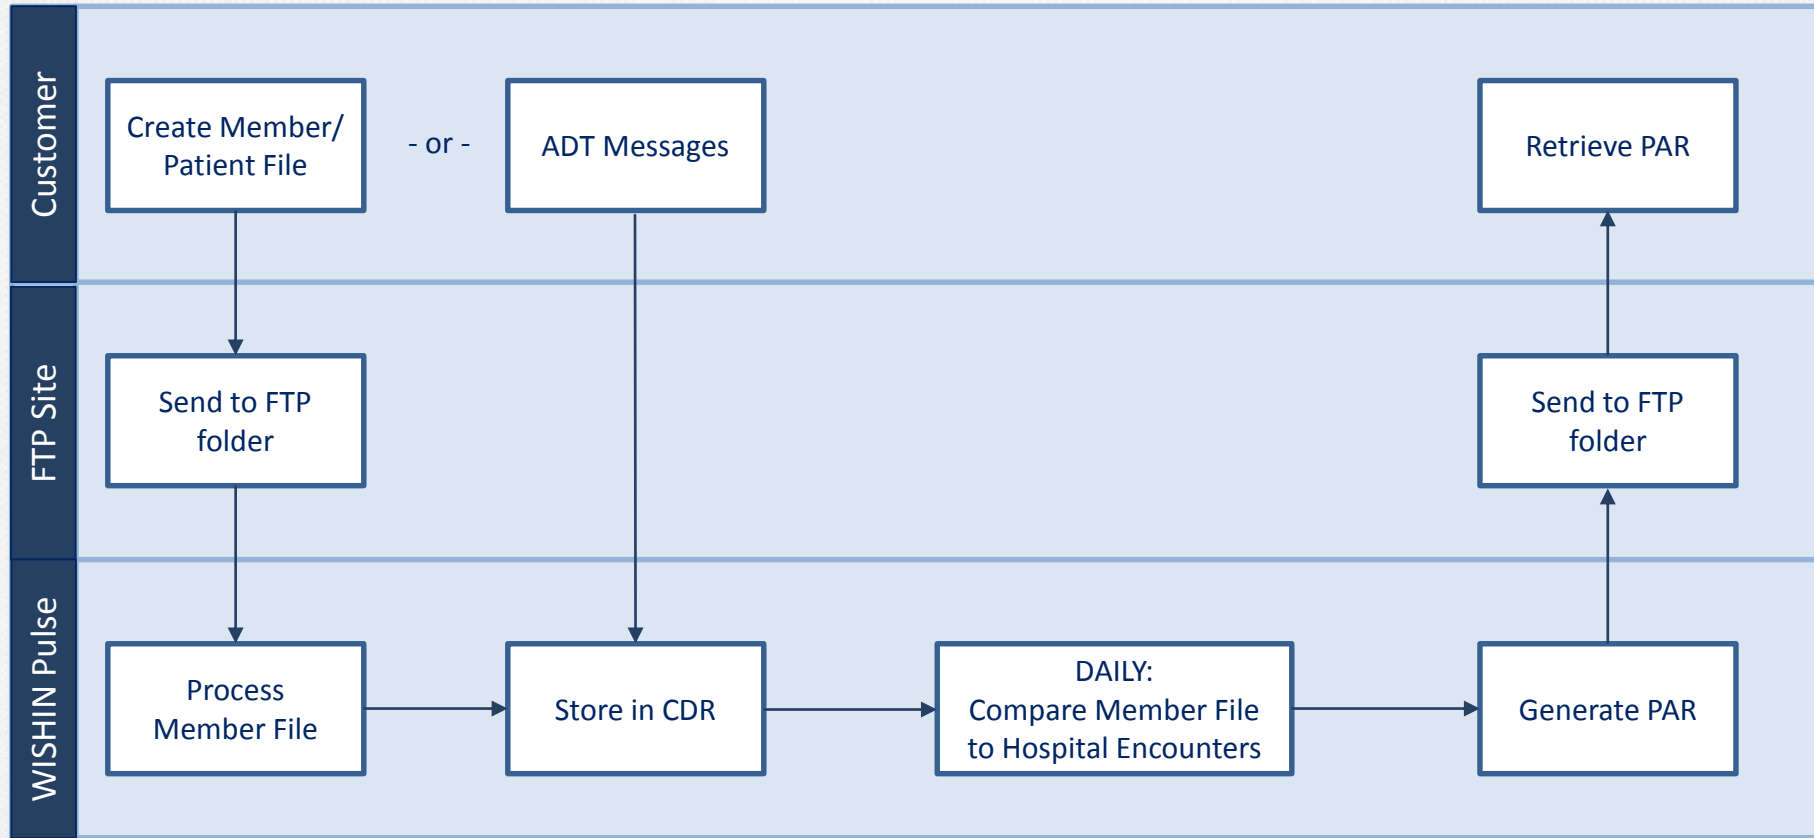

- Recipient organization's patient identification number
- Event type (admission, discharge, diagnosis change, insurance change, demographic change)
- Patient demographics
- Encounter type, admission date/time, and discharge date/time
- Discharge disposition
- Account/visit number
- Insurance information
- Diagnosis and/or chief complaint
- Hospital where the visit occurred

DATA SUBMISSION REQUIREMENTS

- Real-time ADT (Admission, Discharge, Transfer) interface
 - or -
- Patient/Member file:
 - Developed per file specifications
 - Sent to WISHIN on a regular basis

PAR PROCESS FLOW

USE CASES AND EXPERIENCES

- Attendees who have been receiving PARs will share some of their use cases and the benefits they've experienced with the PAR
- Suggested enhancements from PAR recipients
- Q&A between PAR recipients, WISHIN, and potential PAR customers

WHAT ARE FUTURE PAR POSSIBILITIES?

- Reorganizing how reports are generated for payers
- Option for real-time notifications instead of a daily report
- Delivery of reports/notifications by various methods
- Making the reports/notifications more easily ingestible into an EHR or other system
