

## Improving Outcomes Throughout Wisconsin

WISHIN enables better coordination of care through partnership with PatientPing

As providers and health systems become increasingly responsible for patient outcomes, the need for visibility into patient encounters outside their virtual four walls is more important than ever. Timely access to the right information can lead to better clinical decisions, more effective transitions of care, and reduced administrative costs. Better information leads to better outcomes.

### PARTNERSHIP

WISHIN and PatientPing have partnered to improve care coordination across the care continuum with a dynamic notification solution. These notifications or “Pings” from 1,982 Wisconsin sites of care in WISHIN’s network, plus thousands more in PatientPing’s national network, offer Wisconsin hospitals, clinics, ACOs, skilled nursing facilities, home health agencies, health plans and others increased visibility into relevant clinical data in real time to facilitate coordination of care and better outcomes for their patients.

### BENEFITS

- Simplify transitions and admissions with access to real-time and accurate clinical data
- Achieve greater visibility into patient movement across the continuum of care
- Apply timely interventions to improve quality metrics (e.g. reduce preventable hospital readmissions)
- Strengthen partnerships to advance value-based care initiatives
